

# Therapeutic Moist Heat therapy

Astra Med's Therapeutic Moist Heat therapy provides deeper penetration to muscle tissue, allowing temporary relief of pain due to sprains, muscle strains, back pain, bursitis, arthritis and more. Moist heat has also been established to increase tissue temperature at a faster rate than dry heat, causing increased circulation and promoting quicker recovery time.

With a wide range of sizes available.

Astra Med Professional hot packs work with most heating units on the market today and will address all your clinic needs.
